Tecnologias Utilizadas

- Oracle Virtual Box:
 - Software de virtualização que visa criar ambientes para instalação de sistemas distintos

Tecnologias Utilizadas

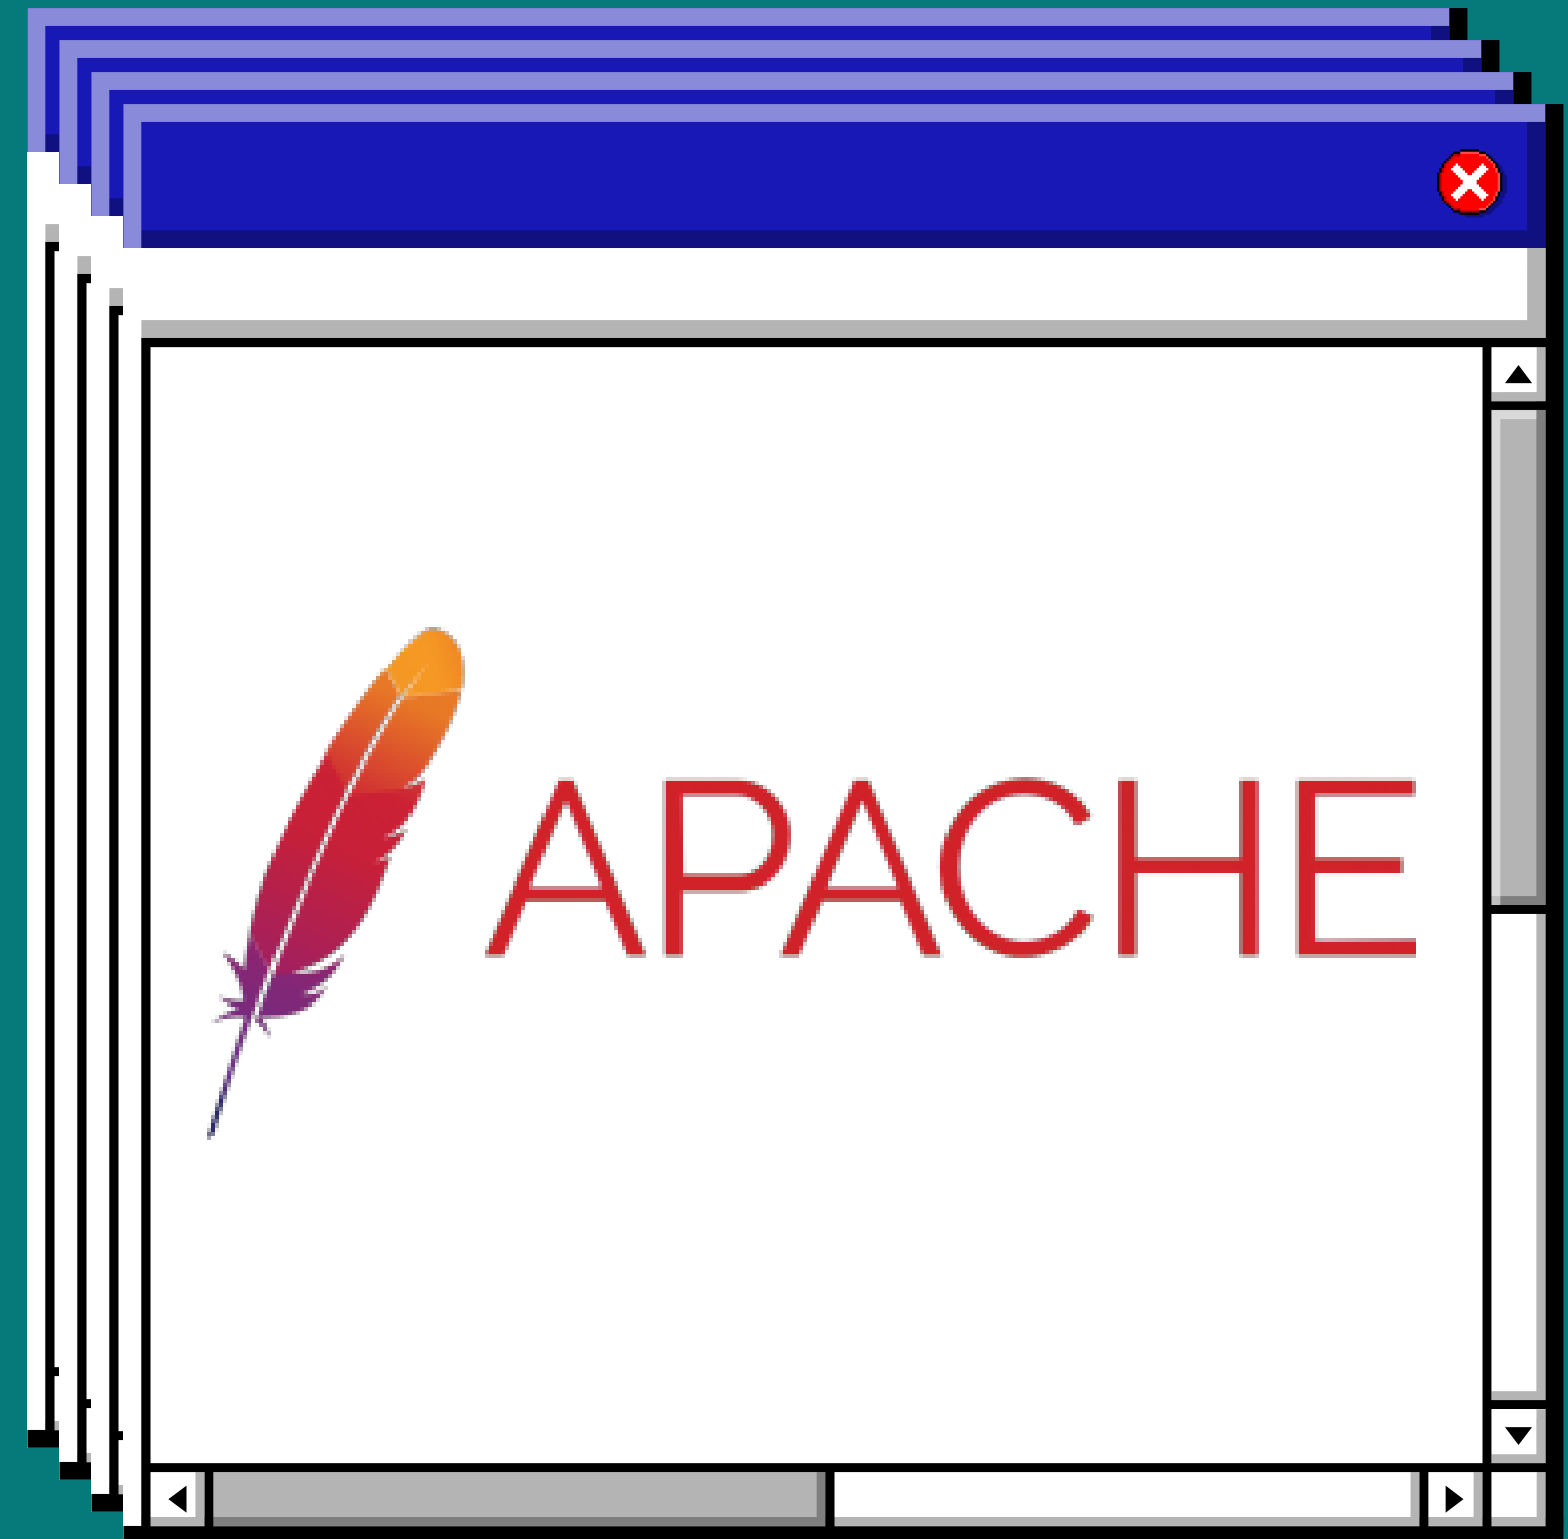

- **Debian - Linux:**
 - Sistema operacional baseado no Linux e tem como compromisso a estabilidade do sistema

Tecnologias Utilizadas

- **Apache2:**
 - Servidor web livre criado em 1995 para que donos de sites mostrem e mantenham seus conteúdos na internet

Tecnologias Utilizadas

- **MariaDB:**
 - Servidor de banco de dados que transforma dados em informações estruturadas em uma ampla gama de aplicações, desde sistemas bancários a sites.

Linguagens Utilizadas

- HTML:
 - Linguagem de marcação utilizada na construção de páginas na Web.

Linguagens Utilizadas

- CSS:
 - Linguagem de estilo usada para para estilizar um documento HTML

Linguagens Utilizadas

- **JavaScript:**

- Linguagem de programação interpretada de alto nível utilizada com HTML e CSS.

Linguagens Utilizadas

- **PHP:**

- O PHP é uma linguagem de script open source de uso geral, utilizada para construir sites dinâmicos, extensões de integração de aplicações e agilizar no desenvolvimento de um sistema.

Arquitetura da Aplicação

A aplicação subdivide-se em dois:

- **Back-End:**
 - Responsável pelo cadastro dos dados da aplicação;
- **Front-End:**
 - Responsável pela exibição dos dados cadastrados no Banco de Dados;

[Back to Agenda Page](#)

WEB

Maquina responsável por armazenar todos os arquivos do Back-End ao Front-End da aplicação. Cuida da parte estrutural e visual dos sites.

Conteúdo

- Servidor Web (Apache2);
- Linguagem (PHP);;
- Páginas HTML, CSS, imagens e Códigos.

192.168.100.10

DATABASE

Maquina do Banco de Dados responsável por armazenar e retornar todas as informações geradas pelo Servidor Web

Conteúdo

- Servidor BD (MariaBD/MySQL);
- Database e Tabelas

192.168.100.20

GUI

Maquina do Cliente final responsável por acessar a maquina que possui o Servidor Web.

Conteúdo

- Interface Gráfica (Xfce);
- Navegador Web;
- Arquivo DNS.

192.168.100.100

MÁQUINAS

* As máquinas se comunicam a partir de uma placa de rede interna denominada ics2022
netmask: 255.255.255.0

Máquinas virtuais utilizadas no projeto

Diagrama ER

Representação visual das entidades dentro de um sistema e como elas se relacionam umas com as outras

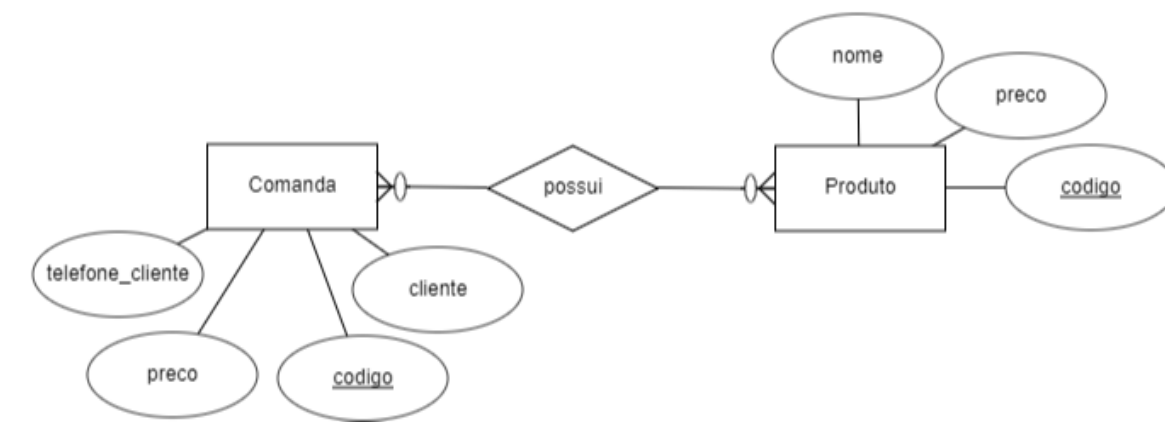

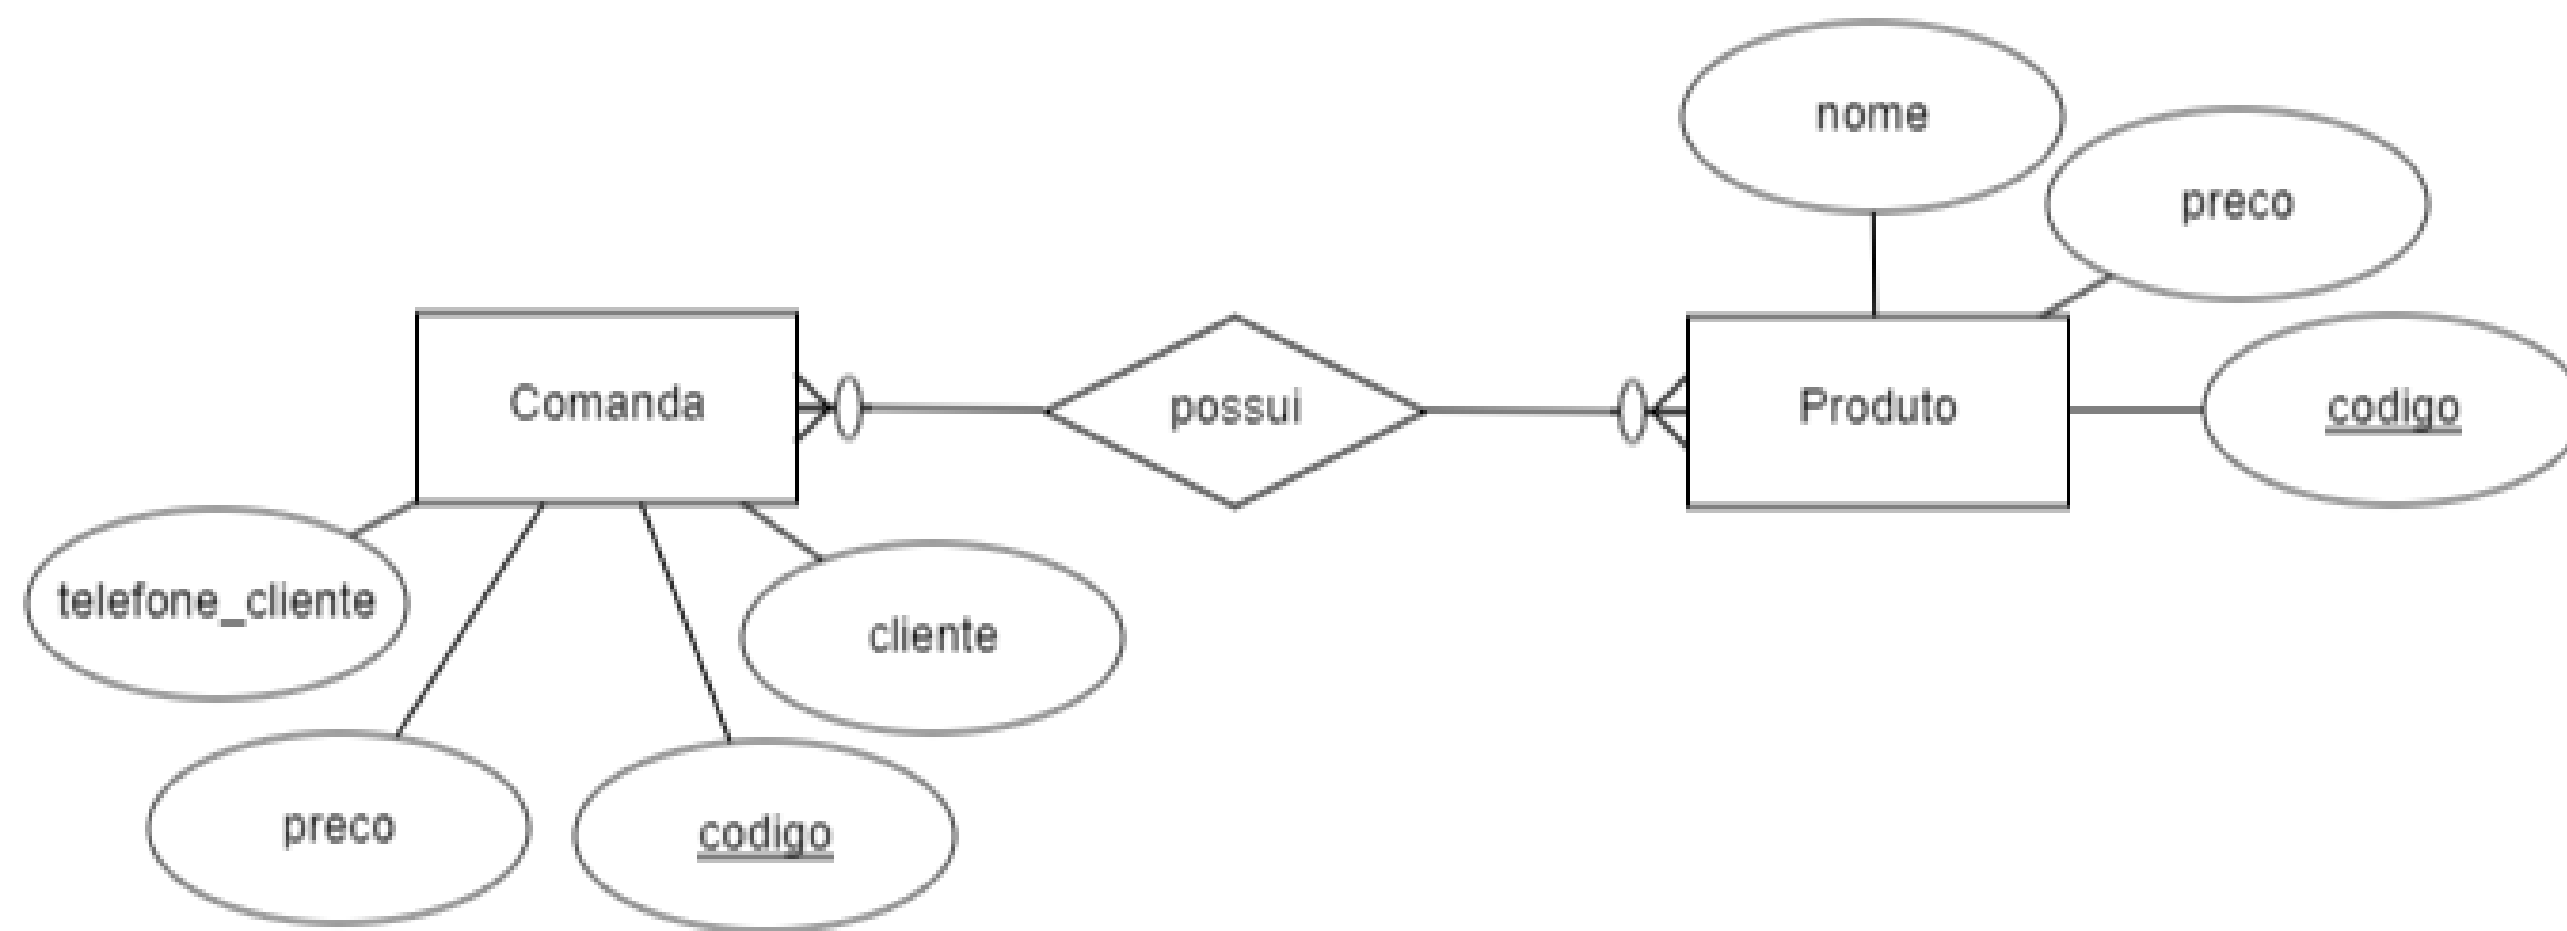

Diagrama ER

PEDIDOS
